

Sprint #2 Report

AllAboard Attendance

07/15/2019

Actions to stop doing:

- *Some tasks were either too specific or not specific enough
- *Code was only pushed when completed instead of committed during progress

Actions to start doing:

Actions to keep doing:

- *Organize model for project
- *Ask questions on Discord when a task is unclear
- *Break up and define tasks more thoroughly
- *Current communication on Discord is very good so far
- *Scrum master and product owner available for questions, availability
- *Getting familiar with Django and other unfamiliar technologies
- *Assigning tasks using SCRUM board
- *Proficiency with git
- *Good code style, easy to understand
- *Quality commenting etiquette

Work completed:

- *Course model
- *User model
- *Page that lists courses
- *Page that lists lectures
- *Lecture creation tool
- *Adding students to lectures possible
- *Front end functionality to add lecture session to course
- *Link to each lecture to display details and information about that lecture
- *Create faculty account
- *Login models

Work not completed:

- *Login views
- *Courses accessible from only faculty
- *Diagram for website flow
- *Sitemap
- *Functionality to close lecture

We've completed two user stories during this sprint. Team members completed about 38 hours of work this week over the course of seven days.
